THE RAGES.
At the New England Fair.

The trouble making on the programme of the New England Fair, situated, as usual, a large share of the attention of the visitors, and a number of good horses, stimulated by the liberal purse offered, exhibited their speed on the track during the week. We have no space for any detail of the races; indeed, although they were interesting, and at times exciting, no extraordinary speed was shown, and nothing occurred to call for special mention.

The first race was on Wednesday afternoon, for the horses of the three minutes class. There were six starters, but Thordale Chief won in three heats, Thordale Boy following close at his heels. The following is the summary:

Manchester driving park, New England Fair, 1st prize on 12 row corn, 100, 1st prize on 12 row corn, 100, 1st prize on 12 row corn, 100.

The official investigation into the cause of the sinking of the steamer "The Arrow" is continued at Boston every day.

The loss by the great fire in Cleveland, O., is estimated at \$2,000,000, and the cause, chiefly of human error, was learned over.

According to the predictions made by a French almanac, the year 1885 will be a year of peace and prosperity, and the world will be at peace.

The supply of the British Post Office Department is complicated in sending its mail bags to this country in the slowest instead of the fastest.

China will be found a hard country to invade, and an equally hard one to defend. This is because China has neither railroads nor good wagon roads.

The Chinese government has virtually declared war against France in the form of a manifesto to the Emperor to the people, calling on them to repel the invaders.

Stanley says he is almost tempted to despair of getting good permanent assistance from Europe, because Europeans will persist in taking the money which is sent them, and then leaving it in the hands of the natives.

The various ball leagues are now made up of a dozen or more clubs. The players already coming high salaries, the pitcher now leading the list. A Providence pitcher was offered \$50,000 for the rest of this season and all the next.

Underground telegraphy is not now an experiment. It is in successful operation in Philadelphia. In many parts of Europe it has superseded the electric telegraph, and in its turn it will supersede the electric telegraph.

The Episcopal ministers of Boston are making preparations to celebrate the centennial of the first meeting of the Episcopal conference of Massachusetts and Rhode Island at the Revolution to provide for the organization of the Episcopal Church in this country.

Railroad managers, in all recent interviews, have been in substance that if the corn crop ripened safely it would make abundant provision for their roads next year. Estimates for the crop now run as high as two thousand million bushels, which is certainly a basis for large expectations.

The cholera is believed to have taken a new turn, and for the worse, according to reports from the East. It is now spreading in India, and is believed to be spreading in India.

At the International Electrical Exhibition in Philadelphia, there are electric appliances of every description, from the hatching of chickens to the electric telegraph.

The cholera is believed to have taken a new turn, and for the worse, according to reports from the East. It is now spreading in India, and is believed to be spreading in India.

Our banks at present hold an enormous reserve—\$109,211,000 of which \$75,672,000 is held in gold and silver.

A meeting of the Association was held at Boston, Mass., on Saturday, the 6th inst., the object of the meeting being more particularly the consideration of the price of milk for the next six months, dating from Oct. 1.

The result was the choice of sixteen delegates. The prevailing opinion favored an increase of the price of milk, and it was decided to call a meeting of the Association at the end of the month.

Complaints are frequently made that the present market is not profitable to agricultural producers. This is due to a variety of causes, principal among which are the overproduction of certain crops, and the competition of foreign producers.

It is supposed, as was recently the case in England, that the present market is not profitable to agricultural producers. This is due to a variety of causes, principal among which are the overproduction of certain crops, and the competition of foreign producers.

The Ploughman.
BOSTON, SATURDAY, SEP. 13, 1884.

THE AROOSTOOK EXHIBIT.
We stated just previous to the holding of the New England Agricultural Fair that the projected exhibition of the products of Aroostook County, in Maine, would constitute one of the features of the great exhibition. The prediction was fully verified.

The exhibit was so arranged in its exhibition as to be highly unique. The effect was quite as impressive as it was impressive. The whole was carried out under the immediate direction of Mr. G. W. F. Jerrard, of Caribou, in Aroostook County, and mainly by his persistent and enterprising personal efforts, and it attracted a share of the public attention that must have been gratifying to the gentleman as it was significant of the general approval and satisfaction.

Mr. Jerrard, a trustee of the New England Agricultural Society, has been very successful in his efforts, and it attracted a share of the public attention that must have been gratifying to the gentleman as it was significant of the general approval and satisfaction.

THE MARKETS.
The extreme warm weather of the present week has had a depressing effect on the butter trade. As it is, however, there is a fair trade, and prices are still on the advance. The improvement in prices at the West of more than a cent per pound, and the St. Albans market is on the advance. There is a special demand for fresh butter at prices about a week or two ago. Fine dairy butter from Vermont is at 22 to 23 cents per pound, and fair to choice at 18 to 20 cents per pound. Cheese has advanced a little, and with cooler weather an active movement is expected. The egg market is, as usual, quiet, and prices are on the advance. Apples are abundant, and from 15 to 18 cents per barrel, and from 10 to 12 cents per bushel. Other fruit is in supply as usual, and prices are on the advance.
